

I, as an Indiana resident, have fought for a law to bring home telephone privacy to Indiana law. We now have such a law. I wish to voice my objection to the petition filed by the Consumer Banker's Association allowing them to begin telephoning my home just as they did prior to the current telephone privacy law in Indiana. Any action changing the current law will only weaken the enforcability of the law that residents and taxpayers have fought to obtain for so long. Thank you.
